To whom it may concern,
My husband and I both completely depend on the government cannabis stores for our CBD products. They have been tested and proved to be very efficient. We both have arthritis in our joints and depend on them as sleep aids. We are both in our eighties. If this proposed store goes into Rosedale, it would make for much easier access for us. I strongly recommend supporting this business because it will be so helpful for the people on this side of Chilliwack, and surrounding communities that don't have any access.
Thank you so much!
